## CVA-ACFP Newsletter July 2016

### NEXT DACUM I PUBLIC WORKSHOPS in 2016

- October 3-6, Vancouver BC
- November 7-10, Toronto, ON

For more information on DACUM : [here](#)

### CVA's PICKS OF THE MONTH

#### [Employer voices, employer demands, and implications for public skills development policy connecting the labor and education sectors](#)

While employers value all skill sets, there is a greater demand for socio-emotional skills and higher-order cognitive skills than for basic cognitive or technical skills. These results are robust across region, industry, occupation, and education level. Employers perceive that the greatest skills gaps are in socio-emotional and higher-order cognitive skills.

These findings suggest the need to re-conceptualize the public sector's role in preparing children for a future labor market. Namely, technical training is not equivalent to job training; instead, a broad range of skills, many of which are best taught long before labor market entry, should be included in school curricula from the earliest ages. The skills most demanded by employers—higher-order cognitive skills and socio-emotional skills—are largely learned or refined in adolescence, arguing for a general education well into secondary school until these skills are formed. Finally, the public sector can provide programming and incentives to non-school actors, namely parents and employers, to encourage them to invest in the skills development process. Skills, labor demand, cognitive, non-cognitive, behavioral skills, competences, employer surveys, skills policy, education policy, training policy.

# ARTICLES and PAPERS

## **China and Africa: a Post-2015 Focus on Higher Education?**

China-Africa cooperation in higher education is characterized by south-south cooperation. Since the Forum on China-Africa Cooperation (FOCAC) in 2000, China has developed a number of African institutional development projects and offered scholarships and Chinese language learning to African students to promote mutual understanding and capacity building. China will obviously expand its cooperation with Africa in higher education after 2015.

## **USA. What if There Just Aren't Enough Jobs to Go Around?**

With fewer places to work, and potentially fewer outside job offers, people cling more tenaciously to existing jobs. That can weigh on productivity, innovation and growth as workers stay put in their jobs rather than look for ones that might better suit them, or take the risk of starting a business. And it leaves fewer openings for new entrants to the job market, such as recent graduates.

## **USA. Vocational Training in Blue-Collar Communities Helps Boys, Disadvantages Girls**

Schools often offer vocational classes at the expense of advanced courses, which can leave young women with few options.

## **Questions and answers: On the role of skills in the 2030 Agenda for Sustainable Development**

The United Nations has adopted the 2030 Agenda for Sustainable Development aimed at transforming our world in the next 15 years. Within the context of this agenda, many of the topics addressed on the [Global Skills for Employment Knowledge Sharing Platform \(Global KSP\)](#) such as training quality and relevance, achieving gender equality

in skills training, youth employability, and lifelong learning, among others, are at the centre of the development process.

### **It's the Company's Job to Help Employees Learn**

Most jobs today demand from employees the capacity to keep learning and developing new skills and expertise, even if they are not obviously linked to one's current job. As academic [reviews](#) have pointed out, people's employability – their ability to gain and maintain a desired job – no longer depends on what they already know, but on what they are likely to learn.

## **DOCUMENTS**

### **Australia. Cultural dimensions of Indigenous participation in vocational education and training: new perspectives**

This study provides new evidence on the inter-relationships between Indigenous Australians' association with their traditional culture and their engagement with vocational education and training. It builds on previous work to develop a 'richer' measure of the concept of cultural attachment. This report discusses the links between cultural identity and current participation in education, and the benefits Indigenous

Australians derive from education and training.

### **Canada. Workplace training benefits employees' health and job performance**

A compelling picture of the positive associations between workers' physical and mental health, their success in job-related tasks, and key business outcomes. The study provides evidence that workplace interventions that increase workers' skills and self-confidence can benefit businesses as well as workers, by reducing work stress and improving job performance.

### **eLearning for undergraduate health professional education**

A defining feature of health systems in the 21st century will be the capacity to respond to populations' needs, while at the same time anticipating future scenarios and effectively planning for evolving requirements. Nowhere is this more apparent than in the health workforce domain: a fundamental mismatch exists between supply and demand in both

the global and national health labour markets, and this is likely to increase due to prevalent demographic, epidemiologic and macroeconomic trends

### **Workforce development in emerging economies: Comparative perspectives on institutions praxis, and policies**

The book's findings, based on cross-sectional data for nearly 30 countries and time-series data for five countries, identify successes and common issues across countries in the sample. In lagging countries, the biggest difficulties relate to: forming and sustaining strategic partnerships with employers; ensuring equitable and efficient funding for vocational education; and putting in place mechanisms to enhance training providers' accountability for results defined by their trainees' job market performance. By framing workforce development in the broader skills-for-growth context and drawing on lessons from countries where well-designed workforce development strategies.
